WOORD VOORAF

Om rationeler te werk te gaan, wordt voortaan het aantal gepubliceerde statistieken op basis van gegevens uit het Rijksregister opgevoerd. Zo wordt de jaarlijkse brochure over de loop van de bevolking in het voorgaande jaar en over de bevolkingscijfers op 1 januari van het lopende jaar, in drie delen onderverdeeld:

- A. Totale bevolking en Belgische bevolking op 1 januari van het lopende jaar;
- B. Buitenlandse bevolking op 1 januari van het lopende jaar;
- C. Loop van de bevolking in het voorgaande jaar en migraties.

Brochure A bevat tabellen over de verdeling van de totale bevolking volgens geslacht, leeftijd en burgerlijke staat tot op het vlak van de gemeente. Dezelfde tabellen werden opgesteld voor de Belgische bevolking. Er is tevens een tabel met de oppervlakte en de bevolkingsdichtheid van elke gemeente. Voorts bevat de brochure leeftijds piramiden voor de totale bevolking en de Belgische bevolking tot op provinciaal vlak. Ten slotte wordt het aandeel van de personen van minder dan 18 jaar en ouder dan 60 jaar alsook de bevolkingsdichtheid met kaarten geïllustreerd.

In brochure B vindt men naast informatie over het geslacht, de burgerlijke staat en de leeftijd van de buitenlandse bevolking, tevens een indeling ervan volgens nationaliteit. Verscheidene tabellen gaan tot op het niveau van de gemeenten. Piramiden tonen de verhouding Belgen en buitenlanders voor elke leeftijd, alsook de leeftijdsstructuur van de buitenlanders volgens hun burgerlijke staat. Het aandeel in de totale bevolking van het aantal buitenlanders enerzijds en van het aantal niet-EU-buitenlanders anderzijds worden op kaarten weergegeven.

In brochure C staan tabellen met gedetailleerde gegevens over de loop van de totale bevolking, de Belgische en de buitenlandse bevolking volgens gemeente, arrondissement, provincie en gewest. In het deel over de migraties staan de tabellen met de migranten die België binnenkomen of verlaten. Immigraties, emigraties en migratiesaldi per gemeente vindt men terug in afzonderlijke tabellen, volgens herkomst en bestemming, per leeftijdsgroep en per nationaliteitsgroep.

LOOP VAN DE BEVOLKING EN MIGRATIES IN 1997

Methode en definities

1. INLEIDING

Sedert 1988 wordt het bevolkingscijfer berekend op basis van de gegevens van het Rijksregister van de natuurlijke personen.

Het Rijksregister is een computerbestand dat wordt beheerd in real-time. Gegevens uit de bevolkingsregisters over al de burgers die in het land verblijven, worden erin samengebracht: geboorten, overlijdens, wijzigingen van verblijfplaats, maar ook huwelijken, enz., alsook bepaalde eigenschappen zoals nationaliteit en geboortedatum.

Door deze gegevens met elkaar te correleren, kan men er zeer gedetailleerde statistieken uit afleiden, zoals de binnenlandse migraties naar herkomst of bestemming en nationaliteit, naar leeftijd, enz.

Doordat het om een computerbestand gaat, kunnen statistieken geproduceerd worden met relatief bescheiden middelen. Dit is in de eerste plaats van belang voor de maker van de statistieken, die op dit vlak maar weinig bewegingsruimte heeft. Maar naar de gebruiker toe zal dit zich, eenmaal de inlooperperiode voorbij, ook vertalen in een kortere publicatietermijn, ondanks de toename van het aantal gegevens.

2. GEVOLGDE METHODE.

Zoals gezegd, centraliseert het Rijksregister van de natuurlijke personen een aantal inlichtingen op basis van de bevolkingsregisters.

De gebeurtenissen worden in chronologische volgorde opgenomen en niet meer geschrapt.

Het resultaat is dus niet een reeks situaties op een bepaald ogenblik (lijst van ingezetenen, gehuwden, enz.), maar het gaat telkens om een volledige voorgeschiedenis. Uit deze voorgeschiedenis kan men echter wel de toestand van de bevolking op een bepaald ogenblik afleiden.

De volledige bevolking de jure wordt gerepertorieerd, hetgeen overeenstemt met de inhoud van de bevolkingsregisters van de gemeenten plus de buitenlanders die er niet in opgenomen zijn, maar zonder het buitenlandse diplomatieke personeel dat in België verblijft.

Volgens artikel 24 quater van de wet van 4 juli 1962 betreffende de openbare statistiek gewijzigd bij de wet van 1 augustus 1985 en de wet van 21 december 1994 houdende sociale en diverse bepalingen krijgt het N.I.S. van het Rijksregister de inlichtingen die noodzakelijk zijn om de taken waarvoor het N.I.S. bevoegd is te kunnen uitoefenen (d.w.z. voor het opmaken van statistieken). Dit zijn:

- naam en voornamen
- plaats en datum van geboorte
- geslacht
- nationaliteit
- voornaamste verblijfplaats
- plaats en datum van overlijden
- beroep
- burgerlijke staat
- samenstelling van het huishouden

Deze gegevens worden beheerd in real-time. De tijd die verloopt tussen de gebeurtenis en de opname in het Rijksregister, is de som van de termijn die is toegelaten voor de aangifte aan de gemeente - variabel volgens de aard van de gebeurtenis - en de tijd die nodig is voor de transmissie naar het Rijksregister.

In de praktijk wordt het overgrote deel van de bewegingen geregistreerd binnen een periode van 4 tot 6 weken. Om allerlei redenen stellen we wel grotere vertragingen vast bij geboorten en overlijdens van de bevolking de jure, die buiten de gemeente plaats vonden of, a fortiori, in het buitenland. Een gelijkaardig verschijnsel doet zich voor bij de vertrekken uit de gemeente, die als nieuwe aangiften in de gemeente van aankomst moeten worden opgetekend. Wanneer men met die onvermijdelijke laattijdige verbeteringen rekening houdt, wordt de toestand op 1 januari door het Rijksregister telkens doorgegeven zoals hij er eind maart uitziet. Men gaat er dan van uit dat nagenoeg alle gegevens over het voorbije jaar zijn opgenomen. Hierdoor komt er echter in de statistische tabellen over de loop van de bevolking toch een kolom "statistische aanpassing" voor.

Uit deze kopie van de gegevens, die het Rijksregister eind maart aflevert, leidt het N.I.S. met behulp van aangepaste programma's de loop van de bevolking af, alsook de verschillende tabellen over de migraties gedurende het voorbije jaar. Daarenboven produceert het N.I.S. nog de demografische toestand van de bevolking op 1 januari en op 31 december van het voorgaande jaar. Laatstgenoemde bewerking levert gelijkaardige resultaten op als men uit een jaarlijkse klassieke volkstelling zou bekomen.

3. DE KWALITEIT VAN DE GEGEVENS

3.1. De kwaliteit van het bevolkingscijfer van het Rijksregister.

De kwaliteit van het uiteindelijke resultaat is afhankelijk van die van elke schakel in de ketting: de gemeenteregisters, de verzending naar het Rijksregister, het beheer bij het Register en de verwerking op het vlak van het N.I.S.

De gemeenteregisters vormen de theoretische informatiebasis en moeten dus worden beschouwd als de beste bron, ook al zijn ze niet perfect.

In dit stadium kan er een overschatting van de bevolking ontstaan, doordat personen die naar het buitenland zijn verhuisd nog in de registers voorkomen. De gemeenten gaan immers niet altijd na of alle personen die zijn ingeschreven, wel degelijk op hun grondgebied verblijven. Als de gemeente geen weet heeft van die afwezigheden, zal haar aangifte over de loop van de bevolking aan het N.I.S. natuurlijk in dezelfde mate fout zijn.

Aan de andere kant - en dit komt meer bepaald voor in bepaalde stadsgemeenten - verblijven er ook niet aangegeven personen, hetgeen tot een onderschatting leidt.

Het verzenden naar het Rijksregister kan enige vertraging veroorzaken, maar het is weinig waarschijnlijk dat fouten in strikte zin daar hun oorzaak vinden, behalve dan misschien in die gevallen waar men die bewerkingen (en het informaticabeheer van de gemeente) in "onderaanneming" heeft gegeven. Over het algemeen blijkt de toestand bevredigend te zijn, na een aanloopperiode die door iedereen blijkaar goed werd verteerd.

Bij de doorloop op het Rijksregister kunnen correcties worden aangebracht door de informatie uit de verschillende gemeenten onderling te vergelijken. Zodoende kunnen dubbeltellingen als gevolg van gelijktijdige inschrijving in twee gemeenten worden uitgeschakeld, en kunnen personen die ambtshalve door hun gemeente van oorsprong werden geschrapt, in een andere gemeente worden teruggevonden.

De laatste jaren werden de registers degelijk geschoond, vooral dankzij de vernieuwing van de identiteitskaarten. Daardoor is het risico voor dubbele inschrijvingen bijna volledig verdwenen, behalve dan bij bepaalde buitenlanders, die bij twee opeenvolgende inschrijvingen telkens een andere naam en geboortedatum zouden hebben opgegeven.

Een belangrijke kwaliteitsfactor van de gegevens uit het Rijksregister en daardoor ook van de statistiektabellen die

wij opstellen, is de doorzichtigheid ervan: verbeteringen aan het bestand kunnen onmiddellijk op het niveau van de individuele inlichtingen worden aangebracht, waardoor ze duidelijk identificeerbaar zijn, hetgeen niet het geval is bij de geglobaliseerde aangiften van de gemeenten.

Een vergelijking met de vroegere methode die werd gebruikt voor de productie van statistieken over de loop van de bevolking, waarbij geaggregeerde gegevens werden verzameld, in de vorm van tabellen die door de gemeenten werden ingevuld, werd in elke uitgave van "Bevolkingsstatistieken" met de loop voor 1988, 1989 en 1990 gepubliceerd.

3.2. Statistische aanpassingen

Om de statistiek binnen een redelijke termijn klaar te krijgen, moet men het Rijksregister gebruiken met de inhoud die het op een bepaalde datum heeft.

Als een compromis tussen snelheid en precisie hebben we geopteerd voor de staat van het Rijksregister op het einde van de maand maart, volgend op het jaar waarvoor de loop van de bevolking wordt geanalyseerd.

Bijsturingen zijn steeds mogelijk in de loop van het jaar dat volgt op een bepaald gebeuren, meer bepaald na het midden van de maand maart, wanneer de kopie van het Rijksregister naar het N.I.S. wordt gestuurd. Als dat gebeurt, worden de correcties gegroepeerd in de rubriek "statistische aanpassing", wat beter is dan telkens weer de toestand van de bevolking op 31 december van het voorgaande jaar te moeten wijzigen. Men moet die rubriek dus zien als de positieve of negatieve balans van de wijzigingen die in de loop van een bepaald jaar aan de gegevens van de voorgaande jaren werden aangebracht. Een overlijden dat plaatsvond in december 1996 maar dat slechts in april 1997 in het Rijksregister werd opgetekend, nadat de kopie naar het N.I.S. werd verstuurd, zal dus samen met andere toe- en afnamen worden verwerkt in de rubriek "statistische aanpassingen" bij de loop van de bevolking in 1997. Aldus wordt de bevolking zoals ze officieel wordt gepubliceerd op 31 december 1996 op basis van de loop van de bevolking in 1996 dezelfde die één jaar later zal dienen als basis om de loop van de bevolking in 1997 te berekenen.

De wet van 24 mei 1994 waarbij een wachtregister voor asielzoekers wordt voorgeschreven trad in werking op 1 februari 1995 en schreef hun inschrijving in dit wachtregister voor. Artikel 4 van deze wet bepaalt dat de in het wachtregister ingeschreven buitenlanders niet in aanmerking worden genomen voor het jaarlijkse bevolkingscijfer.

3.3. Kwaliteit van de gegevens

Voor een globale beoordeling van de kwaliteit van de gegevens dient men er in België rekening mee te houden, dat er dagelijks ongeveer 1500 inschrijvingen en schrappingen worden verricht, waarvan een 150-tal verhuizingen vanuit of naar het buitenland.

Vrij verkeer en vrije keuze van woonplaats worden in Europa als burgerrechten beschouwd, hetgeen ook betekent dat de reële woonplaats niet streng wordt nagegaan en dat er maar weinig grenscontroles zijn.

In die omstandigheden kan men moeilijk verwachten dat de bevolking nog nauwkeuriger wordt vastgesteld.

Die nauwkeurigheid behoort waarschijnlijk, samen met de Scandinavische landen, tot de beste ter wereld. Ook daar wordt een geïnformatiseerd bevolkingsregister in real-time bijgehouden.

4.1. Brochuren A en B (totale, Belgische en vreemde bevolking op 1 januari 1998)

In de tabellen naar leeftijd zal voortaan de hergroepering naar leeftijdsklasse het volgende zijn: 0-17, 18-64, 65 jaar en meer, in plaats van 0-14, 15-64 en 65 jaar en meer. Het aantal personen van 0 tot 17 jaar wordt dikwijls gevraagd en het aantal personen van 0 tot 14 jaar kan in elk geval gemakkelijk verkregen worden door samenvoeging van de drie leeftijdsgroepen 0-4, 5-9 en 10-14.

4.2 Brochure over de loop van de bevolking en de migraties in 1997.

Toelichting bij de gebruikte termen:

Als migrant wordt beschouwd wie van gewone verblijfplaats verandert.

Migratie is de verandering van gewone verblijfplaats. In tegenstelling tot de voorgaande term kan de migratie meer dan één beweging van een persoon gedurende de beschouwde periode - doorgaans een jaar - inhouden.

De volgende verandering is aangebracht vanaf het jaar 1997: als een persoon verscheidene keren tijdens het jaar is gemigreerd binnen eenzelfde gemeente, zijn al de migraties in de tabellen inbegrepen. Vroeger was dat het geval niet.

Op nationaal niveau heeft men het regelmatig over

immigratie en emigratie, terwijl op gemeentelijk vlak de termen "inwijking" en "uitwijking" worden gebruikt, waarbij men aangeeft of het om binnenlandse of buitenlandse migraties gaat. In beide gevallen wordt het verschil tussen immigratie en emigratie, of tussen in- en uitwijking, weergegeven in een balans of migratiesaldo.

Ambtshalve geschrapte personen zijn personen die uit het bevolkingsregister van een bepaalde gemeente worden geschrappt, doordat hun vertrek officieel door het schepencollege wordt vastgesteld. Om allerlei redenen wordt een niet onaanzienlijk deel van die ambtshalve geschrapte personen vroeg of laat opnieuw in dezelfde gemeente of in een andere Belgische gemeente ingeschreven. Indien een persoon binnen het jaar van de schrapping opnieuw wordt ingeschreven, wordt hij niet in aanmerking genomen. Indien dit tijdens het volgende jaar of in een andere gemeente gebeurt, wordt hij geboekt als herinschrijving. In de tabel 00.83 en 00.87 staat de uitsplitsing van de ambtshalve geschrapte personen en de heringeschreven personen, zoals hierboven beschreven.

In de andere tabellen daarentegen wordt de balans van de ambtshalve geschrapte personen min de heringeschreven personen verrekend in de externe emigratie, waarin tevens de statistische aanpassing wordt verwerkt. Die cijfers tonen wat men in de meeste gevallen vaststelt, namelijk dat het bij geschrapte personen die niet opnieuw worden ingeschreven, meestal gaat om buitenlanders die naar hun land van herkomst zijn teruggekeerd, zonder dat zij het gemeentebestuur hebben verwittigd. We hebben deze plausibele werkhypothese verkozen boven een methode die erin zou bestaan om de geschrapte personen bij de emigratie naar het buitenland te voegen en de herinschrijvingen bij de immigratie uit het buitenland. Die laatste voorstellingswijze zou het aantal immigraties op onverantwoorde wijze doen aanzwellen, hoewel het niet gaat om personen die werkelijk het land binnenkomen.

In de tabellen volgens leeftijd 83.02 en 83.04 over de migratie volgens leeftijd bedoelt men met 'leeftijd' de leeftijd van een persoon op 31 december van het voorgaande jaar (verschil in jaartal). In tabel 83.04 werd de vorige jaren geen enkele migratie opgenomen voor de wijzigingen van verblijfplaats binnen de gemeente op leeftijd 0. Deze inlichting is voortaan beschikbaar.

LOOP VAN DE BEVOLKING

Aanwijzingen voor de lectuur van de tabellen

De geboorten zijn die van de personen wier moeder in de gemeente verblijft.

De overlijdens zijn die van de personen die in de gemeente verbleven.

De kolom "Intern - immigratie" zijn de opgesomde inschrijvingen in de gemeente van personen die uit een andere Belgische gemeente komen.

De kolom "Intern - emigratie" zijn de opgesomde schrappingen uit de gemeenteregisters van personen die in een andere Belgische gemeente zijn gaan wonen.

De kolom "Extern - immigratie" zijn de opgesomde inschrijvingen in de gemeente van personen die uit het buitenland komen.

De kolom "Extern - emigratie" - zijn de opgesomde schrappingen uit de gemeenteregisters van personen die in het buitenland zijn gaan wonen.

De aanpassingen geven:

De opnieuw ingeschreven na schrapping - Personen die in het vorige jaar ambtshalve geschrapt werden en die in een andere gemeente (meestal) of in dezelfde gemeente (minder vaak) werden ingeschreven.

De ambtshalve geschrapte bevolking - Personen die uit de registers werden geschrapt nadat men hun verdwijning had vastgesteld

De statistische aanpassing - Saldo van de verrichte bewerkingen van het voorgaande jaar, die nog niet verrekend waren door het Rijksregister op het ogenblik dat hij de listing van de bewegingen van dat jaar aan het N.I.S. had doorgegeven. De vermelde cijfers in de kolom totale groei stemmen dus niet overeen met het verschil tussen het cijfer van de bevolking op 31 december en dat van 1 januari van het lopende jaar, omdat dit verschil rekening houdt met de statistische aanpassing.
